YOUSMA KHAYYAM

Software Engineer|DevOps Engineer| AI Automation & n8n

+92 324 7703152
https://www.linkedin.com/in/yousmak/
yousmakhayyam@gmail.com
Faisalabad, Pakistan

PROFESSIONAL SUMMARY

Software Engineer, Cloud & DevOps Engineer, and AI Automation Developer with nearly 2 years of professional experience building, deploying, and automating software and cloud solutions. Experienced in Microsoft Azure, AWS, Kubernetes, Terraform, Docker, CI/CD, and Linux, along with developing AI-powered automation workflows using n8n, APIs, databases, and AI agents.

Hands-on experience building and maintaining production automation workflows, including lead generation, email marketing, email delivery and engagement tracking, AI-powered data processing, and business process automation. Also experienced in Upwork bidding, business development, international client communication, technical requirement understanding, and matching client needs with cloud, DevOps, and automation solutions.

Strong background in full-stack development with React.js, Next.js, Node.js, Express.js, and MongoDB, with a focus on scalable applications, cloud-native infrastructure, intelligent automation, and business-focused technology solutions.

SKILLS & CORE COMPETENCIES

- **Frontend:** React.js, Next.js (SSR & SSG), Tailwind CSS, TypeScript, Electron.js
- **Backend:** Node.js, Express.js, Firebase (DB/Auth), MongoDB,AI Agents
- **Programming:** Python,C++,SQL
- **AI & Automation:** n8n, AI Agents, AI Workflow Automation, Workflow Design, API Integrations, Webhooks, LLM Integrations, Automated Lead Generation, Email Automation, Business Process Automation
- **APIs:** REST, GraphQL, 3rd-party API integrations
- **Business Development:** Upwork Bidding, Proposal Writing, Lead Generation, Client Communication, International Client Interaction, Requirement Analysis, Technical Solution Matching
- **DevOps & Tools:** Git, GitHub Actions, CI/CD, Vercel, Docker, AWS,Microsoft Azure,Docker,Kubernetes (RKE2),Terraform,,ArgoCD,Traefik,Linux, Nginx,CI/CD,SSL,Load Balancers

PROFESSIONAL EXPERIENCE

Cloud Engineer | AI Automation & Business Development Feb 2025 – Present

PufferSoft

- Designed and deployed cloud infrastructure on Microsoft Azure and AWS using Terraform (Infrastructure as Code).
- Built and maintained automated CI/CD pipelines using GitHub Actions.
- Managed Kubernetes (RKE2) clusters, Traefik Ingress Controller, SSL certificates, and AWS Load Balancers.
- Containerized applications using Docker and deployed workloads on Linux servers.
- Configured Azure networking resources including Virtual Networks, NAT Gateway, and App Services.
- Collaborated with developers to deploy scalable production-ready applications.
- Troubleshot deployment and infrastructure issues across cloud environments.

- Develop and maintain production-ready n8n automation workflows connecting APIs, databases, AI services, and business applications.
- Built an automated lead generation workflow that collects company and decision-maker information, enriches lead data, identifies relevant contacts, and prepares verified business contact information.
- Developed an email marketing and sending workflow that automates personalized business emails and manages recipient information and approval processes.
- Implemented email engagement tracking to monitor email activity such as opens and clicks and maintain tracking information for outreach campaigns.
- Developed additional AI-powered automation workflows for data processing, SQL/database interaction, and business process automation.
- Integrated external services and APIs into automation workflows while troubleshooting authentication, data accuracy, API, and workflow execution issues.
- Worked on reducing the operational cost of automation workflows while maintaining the required output and functionality.
- Collaborate with technical and business teams to understand requirements and convert them into practical cloud, automation, and software solutions.
- Started working on Business Development and client acquisition, including Upwork bidding, proposal preparation, lead generation, and communication with international clients.
- Analyze client requirements and identify suitable cloud, DevOps, Kubernetes, automation, and software development solutions based on business needs.
- Prepare and customize Upwork proposals for relevant technical projects and participate in the client communication process.
- Support business outreach through Upwork, LinkedIn, referrals, and other lead-generation channels.
- Communicate technical services and solutions in a clear, business-oriented way for both technical and non-technical audiences.

Cloud Intern **Nov 2024 – Jan 2025 PufferSoft**

- Assisted in Azure resource provisioning and App Service deployments.
- Worked with GitHub Actions to automate application deployments.
- Learned Infrastructure as Code using Terraform.
- Supported cloud deployment and Linux administration tasks.

EDUCATION

Bachelor's in Software Engineering **2022 – 2026**
The University Of Faisalabad**(TUF)**

- Relevant Coursework: Data Structures, Database Systems, Cloud Computing
- Final Year Project: SkillLoop – AI-powered Peer-to-Peer Learning Platform
- Focused on Full Stack Development, Cloud Computing, and DevOps

KEY STRENGTHS

- Full Stack Web Development
- Cloud Infrastructure (AWS & Azure)
- DevOps & CI/CD Automation
- Kubernetes & Docker
- Infrastructure as Code (Terraform)
- AI Agents & AI Automation

- REST API Development
- Problem Solving & Debugging
- CI/CD Automation
- AI Agents & API Integrations
- Lead Generation & Business Automation
- Email Automation & Engagement Tracking
- Upwork Bidding & Proposal Development
- International Client Communication
- Technical Requirement Analysis
- Problem Solving & Troubleshooting

PROJECTS

SkillLoop (Final Year Project)

Built a peer-to-peer skill learning platform with authentication, real-time communication, scheduling, and gamification using React, Next.js, Node.js, MongoDB, Socket.IO, and JWT.

Cloud Infrastructure Automation

Provisioned Azure and AWS infrastructure using Terraform, deployed containerized applications with Docker and Kubernetes (RKE2), configured Traefik, SSL certificates, GitHub Actions CI/CD, and AWS Load Balancers.

AI Chatbot

Developed an AI-powered chatbot integrating modern AI APIs to automate customer interactions and provide intelligent conversational responses.

E-Commerce Website

Developed a responsive e-commerce application featuring user authentication, product management, shopping cart, order processing, and secure checkout functionality.

Production AI Automation & Lead Generation System

n8n | AI Agents | APIs | NocoDB | Email Automation

- Developed a production automation system for business lead generation and outreach.
- Automated company research, lead enrichment, decision-maker identification, contact data processing, and email preparation.
- Integrated multiple external APIs and data sources into n8n workflows.
- Implemented verification and validation logic to improve contact data accuracy and reduce incorrect or fabricated email addresses.
- Connected lead-generation data with automated email outreach and tracking workflows.

Automated Email Marketing & Engagement Tracking

n8n | APIs | Email Automation | Tracking

- Built a production workflow for personalized business email generation, approval, and sending.

- Automated recipient selection and personalized email content based on lead information.
- Implemented email activity tracking for **opens and clicks**.
- Added workflow logic for email status management and campaign tracking.
- Improved email content to be more business-focused, concise, and suitable for international prospects.
